

What Does the Blue Box Monitor?

- ✓ Blood Pressure Monitor – Helps track and manage heart health.
- ✓ Pulse Oximeter – Measures oxygen levels in the blood.
- ✓ Bluetooth Thermometer – Provides accurate temperature readings.

As someone who has personally tried this system, I can assure you that the checks are simple, comfortable, and dignified.

Why is This Important?

This service allows us to monitor vital signs and detect early signs of potential health concerns before they become serious. All readings are securely logged in a “virtual ward”, where we can easily track trends and identify any changes in health. The system also generates a NEWS2 (National Early Warning Score) within two minutes, providing rapid insights without the stress of long wait times for test results.

A Comprehensive Approach to Well-Being

Beyond monitoring vital signs such as blood pressure, temperature, pulse, and oxygen levels, the Whzan Blue Box can also assess respiration rate, consciousness levels, nutrition, hydration, and frailty. This comprehensive approach helps ensure that any potential health risks are identified early, allowing for timely follow-up and possible intervention.

We are excited to offer this innovative health monitoring service to determine the degree of illness of our clients and prompt critical care intervention if necessary, as part of our commitment to providing the highest level of care and support for our valued clients.

If you'd like to learn more about how our Digital Health Check Service can benefit you or a loved one, please don't hesitate to get in touch.

Proven Results: Reducing NHS Strain with Digital Health Checks

At Right at Home, we are committed to going above and beyond to support the well-being and physical health of our clients. From offering free Chair Yoga sessions to promote mobility and overall health, to finding innovative ways to provide health checks with minimal stress or discomfort, our focus is always on delivering compassionate and high-quality care.

We are pleased to introduce you to our new Whzan Blue Box which is a **Digital Health Check Service; NEWS2 (National Early Warning Score)**. This standardised digital health check assessment, created by the Royal College of Physicians and routinely used within the NHS is proven to help with;

- 22% - Reduction in 999 ambulance requests
- 35% - Reduction in unplanned GP visits
- 50% - Reduction in 111 calls

Since 2011, Whzan has been revolutionising healthcare assessments, helping thousands of people, in the UK, reduce unnecessary trips to the doctor's office or hospital. With this technology, we can now carry out essential health checks quickly and efficiently, providing peace of mind to our clients and their families.
